1 Introduction

1.1 Elevator Pitch

[One- or two-sentence pitch goes here.]

1.2 Concept

[Concept paragraph goes here.]

1.3 Design Pillars

- **Pillar 1.** *[Short statement.]*
- **Pillar 2.** *[Short statement.]*
- **Pillar 3.** *[Short statement.]*

1.4 Genre and Inspirations

- *[Reference]* — *[what is borrowed / what is rejected]*.
- *[Reference]* — *[...]*.

1.5 Core Loop

1. *[Step 1 — the player ...]*
2. *[Step 2 — which leads to ...]*
3. *[Step 3 — and finally ...]*

1.6 Scope of this Document

This is a living document. Sections evolve as the project does.

- **Mechanics** — design rationale and implementation notes for the game's core systems.
- **Devlog** — chronological entries describing progress, problems encountered, and decisions made.

1.7 Project Conventions

- **Engine:** *[engine and version]*.
- **Language:** *[language / runtime]*.
- **Source layout:** *[where gameplay code lives, where scenes/prefabs live]*.
- **Naming:** *[namespace / folder conventions]*.

2 Core Mechanics

2.1 Player Character

What it is. *[The player is a ... implemented as ...]*

Why it exists this way. *[...]*

How it is built. *[...]*

2.2 Verbs and Abilities

- *[Verb]* — *[input / effect / cost]*.
- *[Verb]* — *[...]*.

2.3 World and Interactables

[Describe the major categories of interactable here.]

2.4 Antagonist / Pressure

Source of pressure. *[...]*

Escalation. *[...]*

Resolution. *[...]*

2.5 Game States and Flow

[Describe the top-level state machine.]

2.6 Cross-cutting Systems

- *[System]* — *[one-line role]*.
- *[System]* — *[...]*.

2.7 Open Design Questions

- *[Question 1.]*
- *[Question 2.]*

3 Devlog

3.1 YYYY-MM-DD — Journal Started

Worked on. Initial L^AT_EX scaffolding for the development journal.

Decisions. Journal is organised into *Mechanics* (timeless, refactored in place as systems evolve) and *Devlog* (append-only, dated entries). *Mechanics* describes the current state of the game; *Devlog* records how it got there.

Open questions. [*What is the first system worth writing up in detail?*]
